Know
When Disaster
Will Strike**

SECUREGUARD

FIRE RESISTANT FILING CABINET

Fire is a killer. It kills not only lives but also kills off business. Statistics show that about 53% of all business whose records were lost in fire, were unable to continue operation within 6 months after the disaster.

This series of fire resistant filing cabinet is the solution to protect your company's vital records and documents from fire. "SECUREGUARD" fire resistant filing cabinet are designed and constructed to conform to stringent JIS heat endurance, drop and reheating tests.

BODY AND DRAWERS

A special interlocking "tongue & groove" structure is adopted in the construction in between the body and drawers, cutting off passage of flames into the interior.

The body and drawer fronts are solidly filled with special insulation material used for providing resistance to fire attack. Each individual drawer compartment is separated to provide individual insulation from fire.

LOCKING SYSTEM

It comprises a high security push lock and a 3 wheel keyless combination lock which is providing 1 million variation.

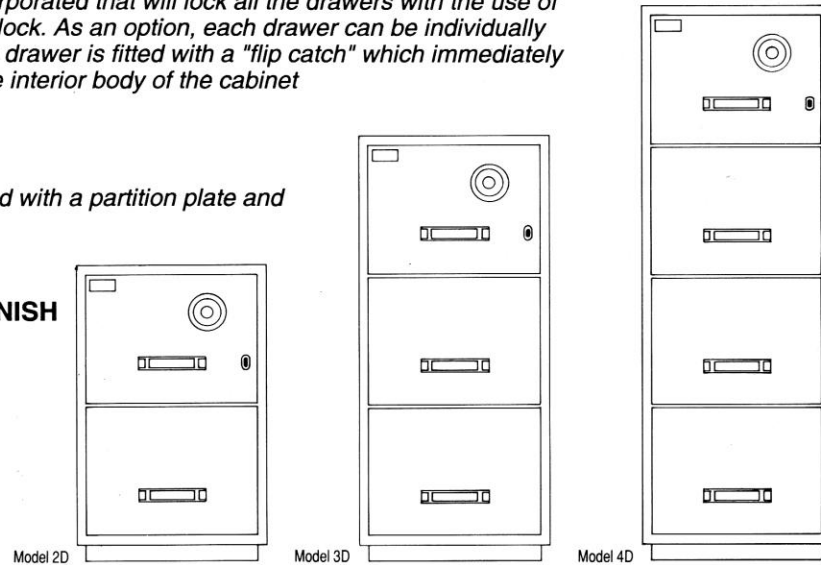

Gang locking device is incorporated that will lock all the drawers with the use of push lock and combination lock. As an option, each drawer can be individually secured by a keylock. Each drawer is fitted with a "flip catch" which immediately secures the drawer onto the interior body of the cabinet after it has been shut.

INTERIOR FITTING

Each drawer will be supplied with a partition plate and suspension railing for filing pockets.

PRODUCT SIZE AND FINISH

This series is available in 3 sizes and finished in 2 tone high quality paints, especially chosen to suit the interior decor of modern offices.

Model	EXTERNAL DIMENSION			DIMENSION OF DRAWER			APPROXIMATE NETT WEIGHT
