

# SECUREGUARD

## MINI OFFICE SAFE

This safe is specially designed and constructed to offer protection of valuables, documents and limited amount of money against fire and burglary. This is recommended to suit the requirement of restaurants, Petrol kiosk, retails outlets, offices, homes and the alike.

### BODY

The overall protective barrier is measuring 50mm thick. The body is robustly constructed by filling with specially formulated proofing material called 'Matrixite' to offer proven resistance against hand and mechanical tools and OXY-acetylene torch.

### DOOR

It is press-formed with the lockcase as intergral part of the door structure, encasing same proofing material used in the body. The protective thickness of doorslab is measuring 50mm.

### LOCKING MECHANISM

The standard locking system for this series is a three wheel combination lock which is providing 1 million variation. A deadlock device is also incorporated to offer additional security on the locking mechanism. There is one way moving bolt to the front and fixed interlocking rebate at rear to offer positive protection when in locked condition.

### INTERIAL FITTING

It is supplied with one adjustable shelf.

### PRODUCT SIZE AND FINISH

It is available in one tone light grey finish.
